Projects

2021,23
Python Projects

MY LIST TODO, DIABETES PREDICTION

This application is designed to create your to do list with the required time and you can also get the notification/remainder when you have to to your task. Here, the module used is Tkinter()-It is a standard Python interface to the Tk GUI toolkit shipped with Python. Python with tkinter outputs the fastest and easiest way to create the GUI applications. Creating a GUI using tkinter is an easy task. In diabetes prediction the user can predict type 2 diabetes using Logistic Regression in ML.The data is taken from Kaggle to train model.

2021
Android Apps

Birthday Wisher , My Wallpaper

I build a Birthday Wishing app using views and layout, that handle clicks and learned navigation from one screen to another using intent(PS this is my first android app). The second app was My Wallpaper in which different wallpaper come when the person click on next button and I have used an API from Internet to make the collection of pics.

Social Club

2022-2023
Rotaract Club of G. L .Bajaj

Treasurer of Club

The objectives of a club council treasurer are to manage the economics of the club council. So somebody in that position would manage the money earned and spent by the club council. I will play a important role in planning, making sure that the club council doesn't end up broke because of an investment that wasn't thought through well. Sometimes it might be a good idea for such a person to give a annual update on the financials of the club council presenting spending and earnings, as well as overviews and trends in consideration of previous years.
